“Never Surrender”

He said...

We as Iraqi youths cannot surrender to some murderers and religion traders who try to prevent us from communicating with the other civilizations, great countries and modern life style. Most politicians now in Iraq try to impose their thoughts and loyalties on the Iraqi people, they want to use the same methods of the dictatorship to control people and steal the country from its nation. The only difference between those and the dictatorship is that the dictator works for himself but those agents work for the benefit of their retarded masters in Iran.

They try to divide the country in order make it easier to be controlled and looted by their masters after the coalition forces leave the country.

Iraqis always lived as one nation; therefore, they were able to face the largest power in the middle-east region, –Iran- and stop their plans to occupy Iraq and then spread to the area. The brave Iraqis fought Iran for 8 years to prevent them from exporting their so-called Islamic revolution to the world. They destroyed this ambition in the corrupted minds of the Iranian revolutionists. But now after Iraq was liberated from dictatorship; the Iranian took a good advantage of this change in Iraq and sent their agents, intelligence and militias to control Iraq.

They are trying hard to make Iraq unstable so the coalition forces will leave the country in the nearest possible time, then Iran will be able to use Iraq as a strong base to penetrate into the middle-east and control this wealthy region and use it again to export their revolution to the world.

The only ambition for the Iraqi youths is to liberate their country from those murderers and religion traders and establish a secular government that will cooperate with the free world in order to make Iraq a strong country that will help the great powers of the free world to protect the middle-east region and the whole world from the danger of terrorism and religious extremists.

We are, the youths of Iraq say ... no to terrorism...no to enemies of freedom... no to ignorance... no to the retardation...

Yes to real freedom Yes to joining the free world.... Baghdad will always be the house of peace.
