“The Pillars of Democracy”

She said :

This top success means reaching to the highest rank in education and what is in my mind now is that the Iraqi youth are being subjected to destruction and disruption of the process of reconstruction so that we request to back up democracy and settle the economic crises and support the youth and student and provide the adequate atmosphere in order to serve our country and work on the interest of the homeland and building. The teaching and education are too pillars for democracy (therefore, we are seeking to backup and strengthen both of them).

My mind brings a herald of the national reconciliation which I considered the best solution to get rid of inserjuncy which will open up a flowery and bright future to the youth and Iraqi People.
