### “The Cons of the Iraq War”

He said:

Violence, terrorism, killing and destruction- is a big title of our life in Iraq. Anywhere we go in Baghdad is a dangerous place. We live a hard life. The psychological and financial state of Iraqi youths is very bad. Youth have no hope to live in Iraq, they cannot buy anything and we don't know when are we going to get rid of all this injustice, horror and violence? I used to put plans for my life. I have the scientific ability to study and succeed, but now I am frustrated as all youths we have postponed our dreams and ambitions like we have postponed everything in our life. We still have a glance of hope that all Iraqis will be united and live in peace within one state under a real strong liberal pro-American government that save the people from the religious theocrats, ethnic partiers and militias which are working to weaken Iraq for the benefit of some theocratic regional power that try to use Iraq and Iraqis as a bridge to dominate the whole middle-east region.

We need real changes to put the base for us to move forward toward the best.
