“Adjusting to a New Life”

The circumstances for the live being is so bad therefore is no work opportunities for the youth but only they can be employed with the police or the National Iraqi Army or any governmental offices which are also vulnerable to the terrorists acts.

To the youth are hopeless because of such deteriorating security condition.

In regard of my home live, I don't have any idea to get out to the street because I m fearing of either be kidnapped or killed therefore, there is no room to practice any hobby or to carryout any activity outside of my house hold.

I m representative of my 40 class mates in the college computer science, We have been very happy when the former regime was brought down, by U.S forces but afterwards our hopes dreams of democracy and freedom have vanished especially after we had voted twice for new government and counsel of representative unfortunately we as the youth have a big problem over the introduction religious and political parties into the academic education the matter that greatly and negatively affected on the teaching process and interfered also negatively on the interaction and communication between the students on the hand and the students whit their teaching staff on the other hand.

In order opinion we are in need to a student union which should be neutral, non religious and non partisan non sectarian independent, and work independently and be supported by the dean and concerned authorities and Ministry of Higher Education in order to iron out all the problems of the student and open up a good chances for the communication between themselves and the teaching staff for purpose of pushing the scientific process in Iraq a head.

The Higher Education Ministry is requested to hold a summer Camps for youth whether inside Baghdad or Kurdistan or neighboring countries area in order to engage them to carry out their personal hobbies and activities similar to the world youth as such Camps may upgrade and develop the horizon of their thinking and innovation and make them forget and rid off the images of killing, kidnapping, decapitation and a lot of various air sly and horrible senses.

We don't like to leave our countries Iraq because we want to serve it whatever, the circumstances Iraq passing through. We Iraqi youth hope that we will find work opportunities soon and we request new Iraqi government to meet our needs for our bright future.

We need the followings:

Computer and internet and services with its training programs and sport programs for all the youth in Iraq.
