### “Social Problems Caused From the War in Iraq”

He says:

We have no life activities. There is no theatre, no art, no recreation, not even any school program for students. There is nothing but terror and lack of electricity, fuel and water in this hot summer. Militias and terrorists are everywhere even within the police and army establishments. We want a government that care for the people and provide them with some security, justice and basic services.

The summer holiday has started weeks ago and we did not hear of any programs for the youth and students. Every day we dream of a better situation and a better life but things are getting worse.

We wish that the youth all over the world could help us and do something to save us from this awkward situation.
